

Northgate Science Principles

We are great scientists when...

...we learn practically

...we are engaged

... we ask our own questions

...we explore and make new discoveries

...we test out our predictions

...we are 'hands on' with different equipment

... we work as a team

...we work with expert visitors or other schools

... we link our science to other areas of the curriculum

...we take our learning outdoors

... we are excited, inspired and innovative
